Can't do it, Patrick. As you can well imagine, we are getting a lot of calls and we are trying to treat everyone fairly. Let's stick to the new schedule.

John,
I was speaking with my Vice President of AQCS (John Kruse) with Kiewit Power, he already made some arrangements to be up there on the 30th. I also scheduled some appointments with other utilities along I-80 for Monday (Hastings and Grand Island).
Is it possible the John Kruse and myself could come by on Tuesday the 30th, anytime will work? We can keep it short and informal.
Or, if your days are tied up we could grab dinner on Monday or Tuesday evening if that is more convenient.
John just has a heck of a lot more insight into the Wet or Dry FGD world than myself, he has built many of them, so I'd like you two to meet.
Thanks for the consideration, you know how the higher ups get when you start changing things on them...

I wish I knew. They have not been very open about providing schedules for their decision making. We are delaying due to other work load and to let time pass in the hopes of finding out more.

Thanks for your understanding.

Subject: Presentation Delay

John,
I spoke with Linda yesterday, delaying our presentation is not a problem at all, I have informed the team.
I just left you a voicemail, as I was hoping that you could give my team an indication of when you expect the NDEQ to give you an indication of whether the scrubber will be wet or dry? I assume that would be one good reason to limit presentations...

Anything signification change since we last spoke?

Thank you,

Patrick Sparks
